

The ARL24 system makes use of the audio channel of a wireless system to transmit a volt free contact e.g. from a PIR, call button etc to the receiver. This can then be used to trigger other external devices i.e. sounders, VCR etc. The system is compatible with all Radiocontact Video/Audio transmission systems.

### Main Features

- 12V DC operation
- Low current consumption <40mA (On state)
- Compatible with all Radiocontact 2.4GHz systems
- Input: Volt Free NC contact
- Output: Change over contacts (1A @24VDC)
- Lightweight Design
- Supplied with Pole Mounting Bracket

### Applications

- Remote PIR trigger indication
- Remote Call Button
- Remote Recording Trigger
- Remote Gate Operation
- Remote Barrier Operation
